AI Enthusiast | Data Scientist | AI Engineer

AI enthusiast with a strong foundation in machine learning, computer vision, and intelligent application development. I combine analytical thinking with creativity to design systems that understand, adapt, and improve user experiences. Passionate about exploring how human-centered AI can solve meaningful problems and push the boundaries of technology with purpose and clarity.

WORK EXPERIENCE

AI Engineering Trainee

AI SkillBridge Pakistan • Batch 1 | Instructor: Ma'am Aqsa • Feb 2026 – May 2026 • Islamabad

- Completed rigorous 3-month advanced AI & deep learning specialization with AXI Technologies, passing official SLAC evaluations
- Core: ANNs, RNNs, CNNs; KhudiChat Virtual Avatar (GenAI) with MediaPipe, OpenCV, Stable Diffusion & GAN-based expression synthesis
- Agentic AI: Transformer networks, LLM custom app integration, autonomous multi-agent systems; Agile/Scrum production sprints

AI Development Intern

Adan Institute of Technology • I9/3, Islamabad • Oct 2025 – Dec 2025

- Built Generative AI apps and production-grade RAG systems using LangChain and LangGraph; programmed intelligent agents
- Collaborated on ML model debugging, system performance optimization, and semantic search pipeline architecture

PROJECTS

EmotiFi — Contactless Emotion Recognition via Wi-Fi CSI

Lead Embedded & Android Developer • Final Year Project, COMSATS University • Sep 2024 – Jul 2025

- Camera-free edge AI detecting emotional states via Wi-Fi CSI from dual-ESP32; custom Java Android app with real-time USB serial streaming, subcarrier mapping, live spectrogram rendering
- EfficientNetV2B0 & ResNet50 (transfer learning) via PyTorch Mobile Lite — 90%+ accuracy across 5 emotion classes; dataset 600→940 samples with person-wise splitting

Aurora — RAG Mental Health AI Assistant

AI Development Intern • Adan Institute of Technology • Oct – Nov 2025

- Production-ready conversational backend: scalable RAG pipelines, multi-agent workflows (Python, LangChain, LangGraph), ChromaDB vector DB with Gemini API for semantic search
- State-driven crisis tracking flows with safety fallbacks and Streamlit UI for real-time interaction

Personal AI/ML Portfolio — saberjan.dev

Frontend & Systems Developer • Independent Open-Source • May 2026

- React 18, TypeScript, Vite, Tailwind CSS, Framer Motion — fully responsive; centralized signature projects (EmotiFi, DanReality) and academic research

CERTIFICATIONS

Python Essentials 1 — Cisco Networking Academy • Issued: May 28, 2026

[Verify Certificate →](#)

Azure AI Fundamentals (AI-900) — Microsoft • Issued: May 23, 2026

[Verify Certificate →](#)

Machine Learning Specialization — Coursera (DeepLearning.AI, Andrew Ng)

AI Engineering Specialization — NAVTTC / SLAC Testing Framework • May 2026

AWARDS & SCHOLARSHIPS

- Jubilee Arts International Talent Showcase (Dance) — Pakistan National Council of Arts (PNCA)

SKILLS

AI/ML & Computer Vision:

API Testing (Manual & Automated), Postman, RESTful APIs, EfficientNetV2B0, Google Colab, LangChain, PyTorch, RAG, ResNet18

Programming & Development:

C++, git, Java, NLP, Python, VS Code

Data & Databases:

Pandas, NumPy, ChromaDB, ONNX.js, Postman, REST APIs

Hardware / Embedded:

ESP32, USB Serial Interfacing, Android Studio (Java)

Tools & Platforms:

Git, GitHub Pages, Google Colab, Azure AI-900, Gemini API

EDUCATION

BSC in Computer Engineering

COMSATS UNIVERSITY ISLAMABAD

HSSC in PRE-ENGINEERING

AGA KHAN HIGHER SECONDARY SCHOOL, GILGIT

SSC in Science

AGA KHAN HIGH SCHOOL, GILGIT
